

Fact Sheet: ROAD PROJECTS 2019

Projects and Plans . . .

This year we plan (weather and time permitting) to upgrade some of our unimproved roads. The projects include:

- **Fox Rd** – Through an OPWC grant we will finish paving Fox Rd over the next 2 years. The total expense for the project is \$340,000 with half coming from the grant and half paid by the Township. The Township's \$170,000 will be partially fulfilled through in-kind work with the rest (\$80,000 to \$100,000) coming from funds allocated in the budget for roads (this will be paid out in materials and services over the next 2 years). The project will start in late summer / early fall of this year by preparing the road and finish in 2020 with paving.
- **Brydle Rd** – This year we plan to install under-drains on Brydle Rd in preparation for a layer of asphalt grindings in 2020. We have requested the grindings from an ODOT 2020 Route 84 resurfacing project that runs from Brydle Rd to the I-90 interchange. If everything goes as planned, Brydle Rd will have a dry, solid base by the end of 2020.
- **Other projects** – Potential projects include:
 - o Dust control on Brydle Rd depending on the under-drain project
 - o Chip & Seal on some smaller roads like Herman Dr in Miller Allotment to seal cracks.

The Numbers . . .

The township has **26** roads totaling a little over **14 miles**. About **11.5 miles** or **80%** are paved.

Thank you . . .

Ashtabula County Engineer, Tim Martin P.E., P.S., and his staff for their assistance in designing these projects, developing estimates, and facilitating their completion.
